

FORD

140 Lawn and Garden Tractor

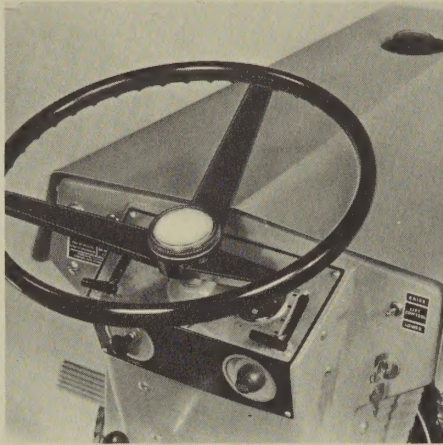

Power, weight and traction combine to speed all your grounds keeping work—mowing, snow removal, lawn maintenance and renovation, gardening and countless other operations. Today's most advanced lawn and garden tractor, new 14 hp Ford 140 features everything to make your work faster, easier. Check the following Ford advantages. See why Ford 140 is your best buy for year 'round ground maintenance work.

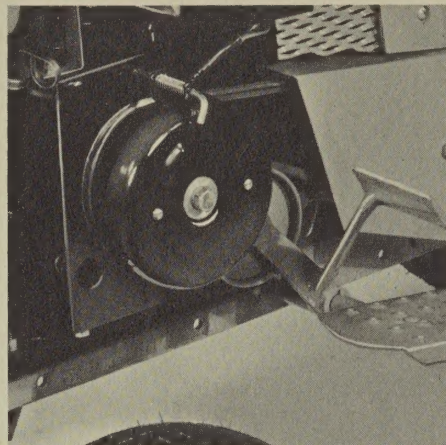

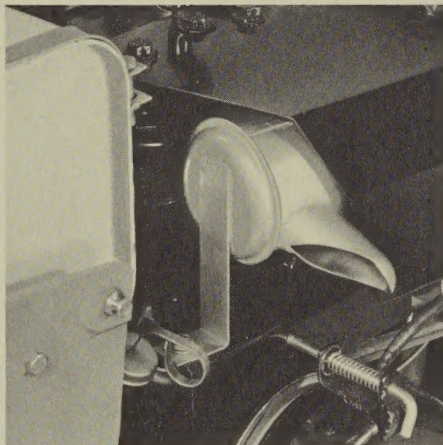

- **Dynamically-balanced engine** delivers a smooth flow of power, eliminates troublesome vibration.
- **Automatic compression release**—for instant starting in any weather, prevents kickback and flooding from over-choking.
- **Electric safety start**—operates in combination with combination clutch-brake pedal. Brake must be "on" or tractor won't start.
- **Hydrostatic drive**—lets operator control travel speed by merely moving a handy control lever. No need to clutch and shift.
- **New limited slip differential** improves traction on slopes, in difficult conditions, speeds snow clearing and drawbar work.
- **New electro-mechanical linkage**. Just flick a switch to raise or lower mounted equipment. Electric power does the work.
- **Electric implement clutch**—engages and disengages power-drive equipment such as rotary mowers and snow throwers.
- **Lighting equipment**—includes sealed beam headlights and a rear flood light with amber lens. This can be operated as a flashing safety light by means of a three-way switch.
- **Wide, foam-rubber seat**—makes operations comfortable, hinged to provide access to a storage compartment, handy for carrying tools or supplies.
- **Fuel gauge filler cap**—shows at a glance the amount of fuel in tank. Also permits refueling without lifting the hood of the tractor.
- **Auto-type parking brake**—easily set, quickly released by pulling a handy release knob conveniently located in the tractor dash.
- **Improved flotation**—is provided by wide-base front and rear tires.
- **Wide variety of equipment** is available for use with Ford 140 including rotary mowers up to 48 inches wide and single- or two-stage snow throwers up to 38 inches wide.

FORD LAWN AND GARDEN TRACTOR

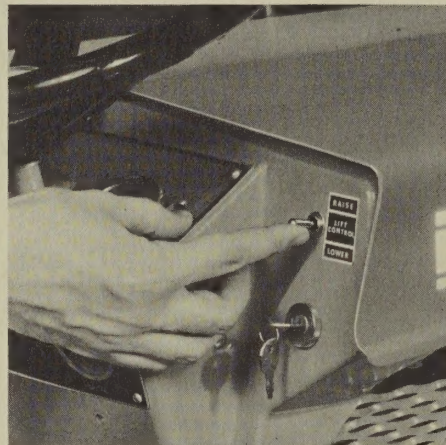

Steering and maneuvering is easy, with a 36-in. turning radius and sporty steering wheel. All controls are contained within the dash, in easy reach of the operator.

Dynamically-balanced 14-hp engine with an improved muffler delivers smooth, quiet power that's a pleasure to run. Bother-some exhaust fumes and heat are deflected away from operator.

Electric implement clutch lets you start or stop power-drive equipment such as rotary mowers or snow throwers with the flick of a switch. Safety light shows when equipment is running.

Mounted equipment—such as a rotary mower—is under electric control. Just flick a switch to raise or lower. New electro-mechanical linkage does the rest.

SPECIFICATIONS
